

Arte del ferro

Apparentemente vecchio e modesto,
in realtà antico e nobile,
il ferro stimola la mia fantasia e
la mia creatività fino a trasformarsi
in metallo pregiato.

Creatività, tecniche antiche e
nuovi strumenti consentono di
realizzare opere originali e
irripetibili

Mauro Bettini

"Appassionato alla lavorazione del ferro battuto, sono sempre alla ricerca di forme e temi nuovi, per dare vita alle mie idee.

In tempi come questi, frenetici e veloci, il mio lavoro sembra fuori dal tempo.

In un mondo in cui i prodotti sono sempre più realizzati dalle macchine, la mia passione per il metallo da' origine a opere interamente fatte a mano... .. e io, che lavoro fuori dal tempo, rimango aggrappato all'antico mestiere."

Creare, per me, è "guardare" un materiale, una forma, e "vedere" un oggetto finito e originale. Creare è l'emozione che provo nel momento in cui "vedo" l'oggetto che ancora non esiste e penso a quello che sarà.

Passionné du travail du fer forgé, je suis toujours à la recherche de nouvelles formes et nouveaux sujets pour donner vie à mes idées.

De nos jours, frénétiques et chaotiques, mon travail semble hors du temps. Dans un monde où presque toutes les choses sont faites en série, ma passion pour le travail du fer forgé crée des œuvres entièrement fait main...et moi qui travaille hors du temps, je m'accroche à mon ancien métier.

Pour moi créer est "regarder" la matière ou une forme et «voir» un objet fini et original. Créer est l'émotion que j'éprouve dans l'instant que je "vois" l'objet qui n'existe pas encore et j'imagine ce qu'il deviendra
